Product Name : Shadowless Mobile Surgical Operation Light - Superior (4 bulbs, 500mm dome dia.)	**Product Code :** SAMCOMEDICAL4007A050

Description :

Shadowless Mobile Surgical Operation Light - Superior (4 bulbs, 500mm dome dia.) The mobile surgical light with its modern optical system and advanced construction design is capable of providing the most up-to date surgical illumination which is very close to natural light and ensure clear visibility of tissues and deeper cavities of the body. It is the ideal surgical light for small operation theaters, specialist's clinics and family planning centres. Specially designed dome of 500 mm dia. with four parabolic reflectors - each fitted with heat absorbing, colour correcting filter and 24V halogen bulb to ensure shadow free, cool and brilliant light with optimized colour rendering. The spring balance system allows unprecedented and effortless lighthead movements. The unique dual function sterilizable handle facilitates precise lighthead positioning and true focus adjustment. Special halogen bulbs (24V X 50W) ensure higher illumination(70,000 Lux) and lesser power consumption in comparison to incandescent bulbs. Provided with a new generation R-CORE step down transformer working on mains 220V AC for 24V supply. Mounted on a heavy, tilt proof steel base with four double wheel castors for silent and smooth floor movements. Impressively finished with extra hard, oven baked polychromatic paint to suit the modern decors of operation theater
